DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claims 5-10 is withdrawn in view of the newly discovered reference(s) to Kelly, Jr. (3,116,737). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 5-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, the recitation "spring and/or magnetic at each ring" appears to be incomplete. Magnetic what? Or should it read "magnet"?

In claim 9, which depends from claim 5, applicant has provided further limitations drawn to the retaining spring. Applicant, however, sets forth a retaining spring and/or magnetic. Since applicant has provided these elements in the alternative form, the retaining spring or the magnetic may be used. For the purpose of prosecution, the examiner has considered the magnetic.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 5-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Kelly, Jr. (3,116,737).

Kelly, Jr. discloses a magnetic loose-leaf device comprising a ring binder with a self-closing ring mechanism (18) comprising an opening bar (40) disposed within the recess (26) of the body portion (24) of the base plate (20), a holding pin (42) and a magnet (46) associated with the pivotal ring member and a locking means for permitting the introduction of perforated sheets.

Response to Arguments

6. Applicant's arguments with respect to claims 5-10 have been considered but are moot in view of the new ground(s) of rejection.
